**HI-CLEAN® PFAS FREE FINISHING**

TEMPOTEST® fabrics are treated with HI-CLEAN® PFAS FREE finishing that makes fabrics water repellent and oil cleanable, proof against rotting and immune to the formation of mould and fungus. Water stains are not absorbed by the highly repellent fabric and slide away without leaving a trace. The rain itself, although rich in pollutants, slides off without leaving a mark and removes residues that have not adhered to the fabric thanks to the barrier obtained with HI-CLEAN® finishing. These properties are long-lasting and the exposure to the sun's rays helps to keep the special finish active.

**TEMPOTEST® MATERIA - An innovative fabric designed to last over time**

A wrinkled and rough hand, due to the typical irregularity of the raw material, characterizes this innovative fabric.

**TEMPOTEST® SETA CRUDA - The return to the natural beauty of imperfection**

A combination of textures which, thanks to a special treatment, enhance the design of these fabrics with details that are naturally uneven.
