# QUALITIES

## THE THREE BEST ANSWERS TO QUALITY RELATED QUESTIONS.

Sattler exclusively uses solution-dyed premium acrylic for its awning fabrics. This insures your patio will remain protected and cool for many years, provided the awning is properly installed and maintained.

**100 % PREMIUM ACRYLIC IS BUILT INTO EVERY SATTLER COLLECTION**

ELEMENTS

LUMERA

LUMERA 3D

COLLECTION  
ELEMENTS

### AWNINGS FROM SOLUTION-DYED BRANDED ACRYLIC ENSURE **QUALITY IN EVERY FIBER.**

Solution-dyed means that the pigment is already added to the yarn during the manufacturing process. Therefore „bleaching“ is never an issue for Sattler fabrics. And since ACRYLIC yarn is resistant to UV without having to add any chemical substances, your awning will last for many years and maintain its stability! Moreover, with TEXgard, Sattler's exclusive finish, water pearls off the surface and dirt does not adhere to it. This finish acts as a protection shield on the fabric.

In our ELEMENTS range, **textured acrylic yarns** are woven together. This creates a unique textile character.

### INNOVATION MADE BY SATTLER - **THE PALPABLE DIFFERENT AWNING FABRIC.**

We were the first to introduce a compact awning weave into the market with a structure which is perceptible by touch. For the fabrics of our LUMERA 3D line we do not only use the **brilliant CBA yarn** in the weft - as in LUMERA - but additionally combine it with the **textured staple yarn** in the warp. This results in unique haptics and visual appearance:

- Remarkable tactile structures.
- Impressive effects due to the special light action.
- Improved dirt and water repellency properties.

### AWNING FABRICS FROM CBA YARN - **A REAL HIGH-TEX PRODUCT.**

We have managed to make awning fabrics more brilliant by using a **smooth and bright** acrylic yarn:

**CBA = Clean Brilliant Acrylic.** What does this actually mean for the awning fabrics of our LUMERA quality?

- The use of this yarn results in a smoother and denser surface, which improves the self-cleaning effect.
- Colors shine even more intensive and clear.
- The textile character remains the same.

Lumera is unique - These awning fabrics are only available at Sattler! When choosing your fabrics, check for the **CBA-button!**

CBA

## SATTLER OFFERS PREMIUM QUALITY IN EVERY FIBER.

**HIGH-TEX** IS NOT ONLY A PROMISE, BUT A FACT THAT CAN BE SENSED IN EVERY YARD OF OUR FABRICS.

Our premium awning fabrics are made from 100 % solution-dyed branded acrylic. This guarantees top-level functionality, outstanding UV protection and an amazing textile feel. Colors resist fading, and fabrics will not break down even after years of exposure to the sun.

Moreover, in our Lumera and Lumera 3D collections, we use CBA-yarn; a fiber exclusively developed for Sattler. 'Clean Brilliant Acrylic' stands for a smooth, brilliant acrylic yarn, which makes it easier to remove dirt and water and makes colors shine brighter.

COLOR: THE DIFFERENCE LIES BENEATH THE SURFACE.

Sattler qualities:  
**Solution-dyed acrylic**

Color pigments are infused all the way to the core of the fiber.

Other qualities  
**Yarn-dyed fiber**

Pigments penetrate just the outer surface of the fabric; thus these fabrics fade over time.

### YOUR BENEFITS:

- Colors remain bright and luminous for many years
- High UV fastness protecting the colors from fading as well as fabric degradation.
- Outstanding water, dirt and fungus repellency
- Best weather-proof outdoor fiber

# TEXGARD finish

## THE SPECIAL ANTI-AGING PROGRAM FOR LASTING BEAUTY.

**TEXGARD EASY CLEAN:** HIGH QUALITY AND LONG LASTING PROTECTION FOR YOUR AWNING FABRIC.

At Sattler, every single fiber is carefully covered with a protective coating. Our proprietary impregnation prevents the permeation by water, humidity and dirt, thus supporting the self-cleaning effect. Dirt pearls roll down the surface like water drops on leaves.

### TEXTILES BY SATTLER DISTINGUISH THEMSELVES THROUGH:

- An outstanding dirt and fungus-repellence
- High water repellence
- Very good rolling behavior
- Excellent textile feeling
- Brilliant and durable colors

OUR FABRICS AS **ROLE MODEL.**

Sense of responsibility is what counts. Therefore, certification according to international quality management system standards such as ISO 9001 and ÖKO-TEX® standard 100 are a must to us. The development and manufacturing of our awning fabrics are in compliance with all established standards required to ensure the quality of our products. Furthermore, our products fulfill all requirements of the REACH regulation, which means that all chemicals we use meet the most demanding criteria of the European Union.

### OPTIMUM CLEANING:

Prolong the life of your awning by cleaning it properly with a soft brush, a mild soap solution and some water. Do not roll up your awning when wet. By following these instructions you will enjoy your Sattler awning for many years.

# ENVIRONMENTAL & ENERGY

## THESE SHADES BLEND WITH THE ENVIRONMENT.

FOR SATTLER, **ENVIRONMENTAL PROTECTION** IS A PRINCIPLE WE FOLLOW EVERY DAY.

The certification according to the ISO 14001 environmental management system norm is a voluntary commitment made by Sattler aimed at achieving a balance between ecological and economic objectives.

The continuous development of our environmental awareness is an integral component of our joint responsibility. Therefore, we supervise and optimize the environmental impact of our manufacturing process.

This is how we contribute towards leaving a healthy planet for future generations.

SOME OF THE ACTIONS WE TAKE:

- Production of our awning fabrics uses only clean energy (CO<sup>2</sup> neutral).
- We use our own capacitors and compressors to heat our facilities
- We optimize our washing and impregnation processes in terms of energy consumption.

### PREMIUM SHADES WITH ENERGY SAVINGS EFFECT.

All our designs are measured according to the amount of heat and light energy that passes through the fabric. Awning fabrics filter at least 70 % of the heat gain. This shows that awnings substantially contribute to saving energy reducing the need for air conditioning.

# UV PROTECTION

## IT IS ALL ABOUT DESIGN AND PROTECTION FOR YOUR SKIN.

SATTLER FABRICS REDUCE **UV PENETRATION BY UP TO 99 %.**

What many of us ignore: we are also exposed to UV rays, which are harmful to our skin, even in the shade. This is why it is particularly important for Sattler that our fabrics undergo the most rigorous tests.

Our fabrics are tested according to the **UV Standard 801**. This testing method does not only consider the fabric when new, but also how the fabric behaves **under different weather conditions**. This means the fabrics are exposed to extreme conditions (e. g. extreme exposure to the sun and weather). This helps to determine if the fabric keeps its durability promise over the years.

This is the only way to ensure that the fabric you choose will meet your demands.

How much protection do we offer?  
 UV 80 = Blocks 98,75 % of UV radiation  
 UV 40 = Blocks 97.5 % of UV radiation

UV PROTECTION IN COMPARISON	UV- or sun protection factor
Light cotton clothes (according to UV Standard 801)	aprox. 2 - 10
Sunscreen when used properly (SPF)	0 - 30
Shadow under a tree	aprox. 5 - 15
Shadow under a parasol (without spec. UV-protection)	aprox. 2 - 15
Sattler sun protection textiles	40 - 80

The indicated UV-protection factor is guaranteed in accordance to the most demanding measurement procedures worldwide: simulation of real situations under extreme weather conditions, such as the simulation of the intensity of the Australian sun. Source: Hohenstein Institute.

# DESIGN SELECTOR

## WE DELIVER THE BEST QUALITY AND THE BEST DECISION MAKING TOOL.

“SATTLER DESIGN-SELECTOR” HELPS YOU TO MAKE A **FAST AND CONVENIENT** PRE-SELECTION OF YOUR FAVORITE DESIGNS.

To optimize the selection of your awning fabrics, you can choose among different outdoor scenes and see them already installed. This will let you see how the awning will look with the fabric you have selected. Once you have made your decision, you can use the on line tool to print out the selection information to share with your dealer/retailer.

With just four simple steps, you can relax, enjoy, compare, select and send your enquiry.

[www.sattler-corp.com](http://www.sattler-corp.com) → Design selector

-  Filter according to color, collection or sample. Choose favorite fabric.
-  Choose an outdoor scene, and view your selection on the awning.
-  Print the technical data sheet of the selected articles...
-  ... or save as a PDF to email directly to your dealer.

## THE WORLD OF SATTLER. OVERVIEW OF THE COLLECTION

WE ARE SURROUNDED BY LIGHT AND COLOR; BOTH HAVE AN IMPACT ON OUR LIFE AND WELL-BEING.

Bring the World of Sattler Fabrics to your home and create your very own “feel-good atmosphere”. Join us in a journey to the most inspiring spots on earth and choose the most beautiful designs in premium quality!

# REGIONAL DESIGN

WE THINK GLOBALLY  
AND ACT **LOCALLY**  
IN THE FULL SENSE OF  
THE WORDS.

1 | Landscape moods

2 | Region specific color resonances define the basic colors.

»SHADOWS FROM MY REGION«

AWNINGS DESIGNS BY SATTLER ARE **SNAPSHOTS OF OUR WORLD.**

The color worlds we perceive in our living spaces are influenced by light, climate, landscape and culture. The color climate of a region is decisive for our well-being. Sattler reproduces these living spaces in their designs and takes them particularly into consideration when creating the country collections, which focuses on the needs of our consumers.

Created in collaboration with Dr. Leonhard Oberascher (Design- and color psychologist)

3 | Our designs emerge out of this.

CBA

# COLLECTION LUMERA 3D

NATURE PROVIDES US WITH EVERYTHING WE NEED. **ALSO WITH IDEAS FOR NEW DESIGNS.**

When we spend time under an awning, we are also spending time in the nature and we want to absorb as much of it as possible. The designs of our LUMERA 3D collection make this happen. With these designs you can feel the structures and the textile character as you enjoy the colors that reproduce the surfaces of the countryside and urban areas. By using yarns with different surface properties we are able to create a 3D effect, not only visually but also in terms of haptic qualities.

## LUMERA 3D

LUMERA 3D **SURFACE** - FASCINATING STRUCTURES QUOTIDIAN SURFACES.

With LUMERA 3D SURFACE we immerse into the world of the 3-dimensional Sattler fabrics. Materials, that we are usually not really aware of, acquire a new meaning in the designs of this collection in terms of structure and color.

# COLLECTION LUMERA

NO LIGHT, NO COLOR  
WITH LUMERA  
COLORS SHINE  
IN A DIFFERENT LIGHT.

We are surrounded by light day and night. Be it radiant sunshine, moonlight or the manifold colors of the artificial illumination in the cities and in the countryside. The particularly smooth surface of the fabrics that form part of the Lumera collection provide the colors with a special brightness, that is then reflected in the designs.

## LUMERA

LUMERA **LANDSCAPE** -  
NATURAL, ELEGANT DESIGNS,  
THAT SUBTLY ENRICH THE  
ARCHITECTURE.

Landscapes with diverse surfaces, varied vegetation influenced by light moods were source of inspiration to these designs. Each awning fabric represents a color hue that interprets different areas in an abstract way.
