

# PRATIC PERGOLA® FEATURES AND PATENTS

The patented “drop catcher” system keeps water from flowing off the sides when the wind is pushing water sideways. Instead the water will flow off the front or into the gutter.

The patented click system allows for easy and safe installation of the fabric and fabric ribs to the frame carriages using an easy “click and lock” system.

This patented “safety box” for the motor installs on the frame with an extra mounting profile. This feature keeps the fabric perfectly straight even in temperature variations. The device makes operating easy and quieter and also stops the motor from operating in case of excessive force. The box is ideally suited for Somfy RTS Altus motors with Telis 1 and 4 remote controls.
