

SOLHARO®

For glass Conservatories and for Sun Rooms

The Solharo® is the ideal solar protection solution for sunrooms and conservatories. With a standard motor, the shade will automatically extend to shade and lower the temperature in the room. The system is designed for solar control and can be used in rain if configured with mesh fabric.

Туре	Standard Frame Colors	Standard Widths	Standard Projections	Recommended Applications	Recommended Fabrics
Tensioned Track System Conservatory Shade	9 standard Sunair colors	Through 27' Split multiple bays See price list	5' through 19' 8" See Price list	Conservatory rooms and wood structures Retractable	Soltis 86 & 92 Mesh Sunbrella / Para

- Protects against the sun and lowers the temperature in the sun room, significantly lowering cooling costs.
- Used for sun protection and solar control only (Not for rain protection unless mounted on a 45 degree slope).
- The fabric blocks the sun before it hits the glass for more effective solar control.
- Prevents fading of your furniture, carpets, curtains, and wallpaper.
- Can cover small to large sun rooms & wood structures.
- Great for residential and commercial applications.
- Easy motorized operation standard.
- Hundreds of fabric or mesh colors to choose from.

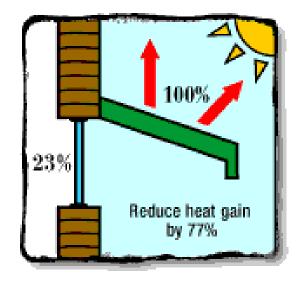

Revised: Dec 14, 2018

BENEFITS OF AWNINGS

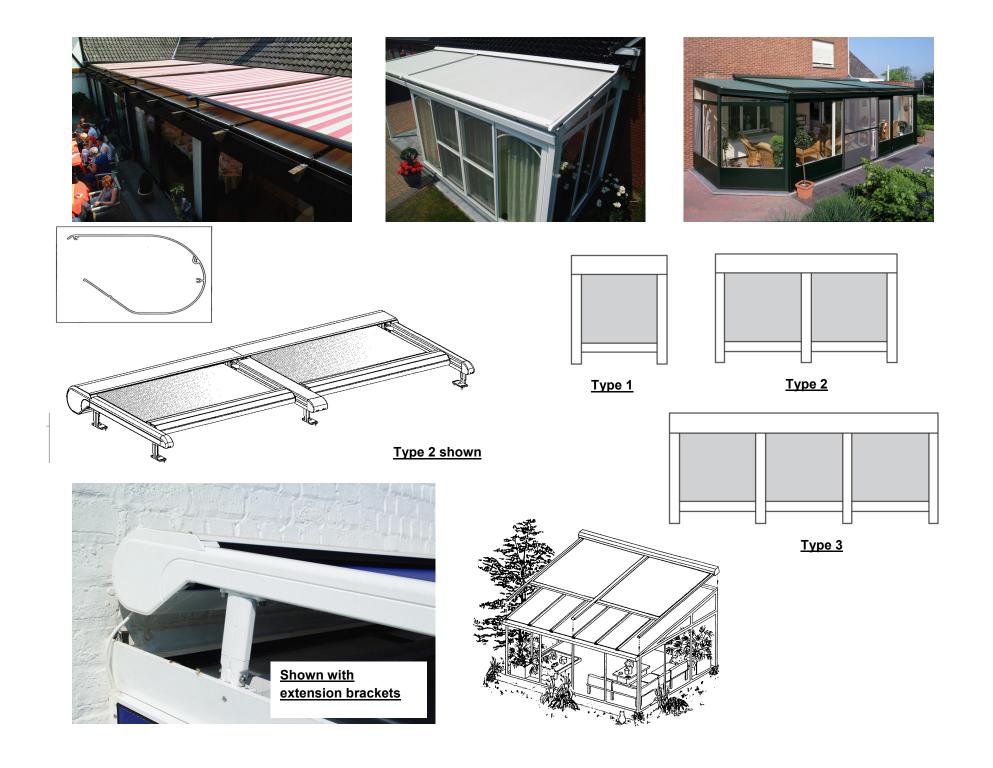

- Reduces indoor temperatures and energy costs while keeping you cool on your deck or patio.
- Reduce heat gain inside by as much as 77% and reduce sunlight and glare through your window by as much as 94% (see Minnesota energy study).
- A Sunair awning keeps you cool on your patio or deck, but it also minimizes your exposure to the sun's harmful rays.
- A Sunair® retractable awning will increase your outdoor living area comfortably and efficiently at a fraction of the cost of a permanent addition

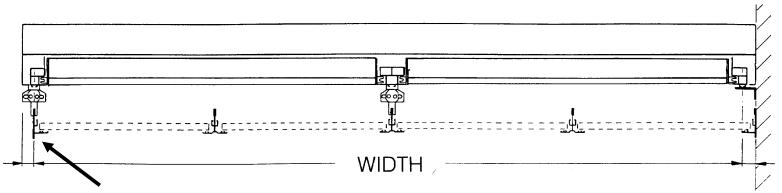

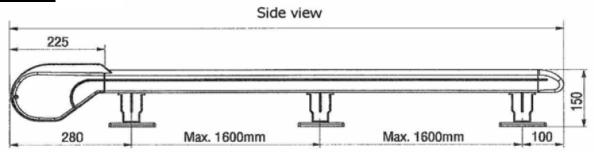

MEASURING SOLHARO

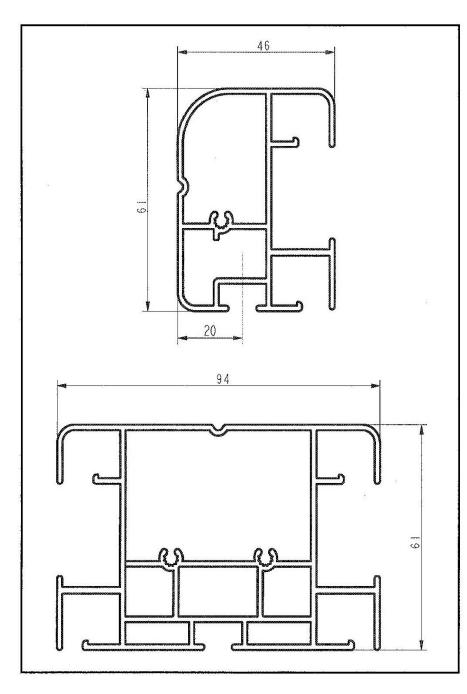

The cassette or end Tracks extends 1" beyond the center measurement of each track

The most important measurement is the measurement center to center of each beam of the structure. All orders must be submitted with the Solharo work sheet showing dimensions. The Solharo will then be manufactured with the guides or tracks running center of the beams. From the center of the outside lateral guides, the system extends 1" on each side (see illustration above). If multiple bays are required indicate where the center of each track needs to be. The bays can vary in size and it is not necessary to have each bay the same size. Consult the office if a bay is less than 6'7". The system can not extend down and around the curve. For best coverage you can extend the track 12" straight beyond the curve of the sunroom.

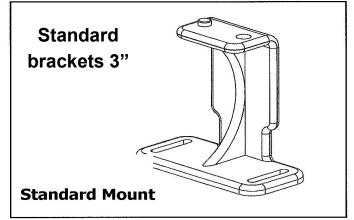

Note: Dimensions in metric mm

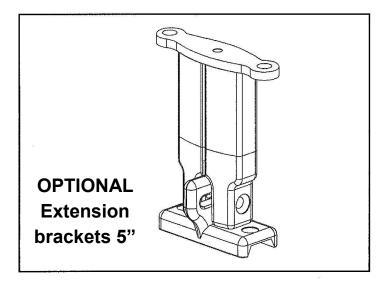

The aluminum housing containing the roller system is 6 $\frac{1}{2}$ " inches high or 165 mm high with the brackets. Different mounting situations can be accommodated (See further technical documents).

Note: Dimensions in metric mm

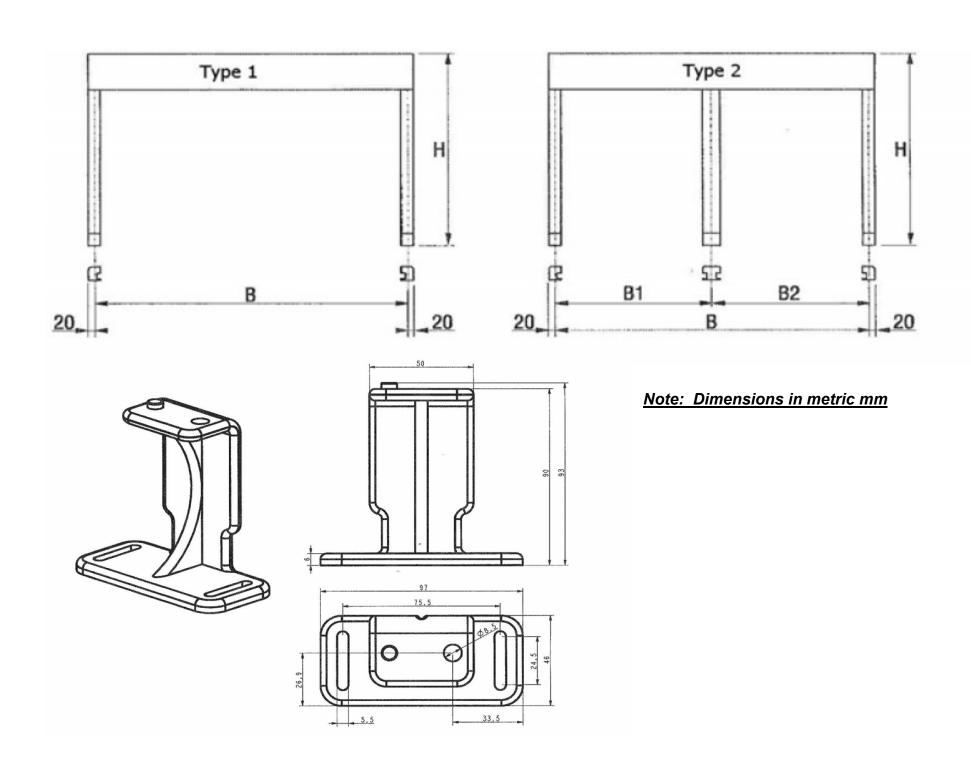

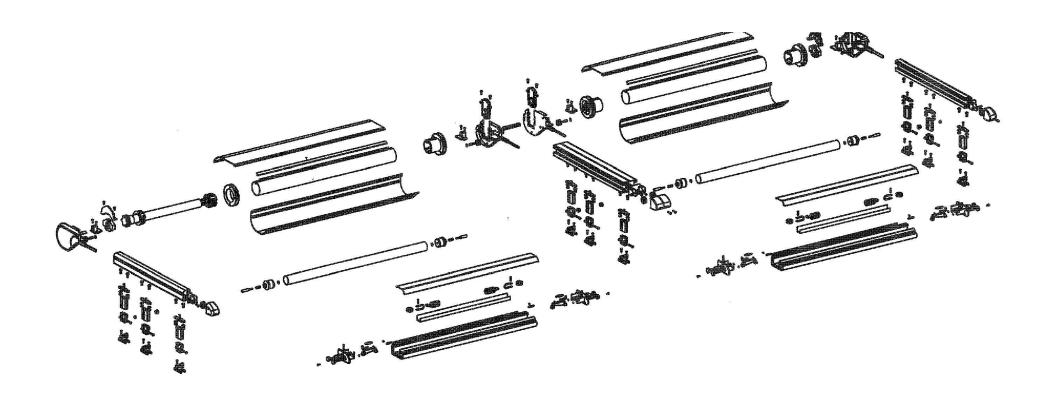

TECHNICAL DATA

Minimum width per section: 2,00m
Maximum width per section: 4,50m
Maximum projection: 6,00m
(14'9")
(19'8")

- Maximum area per fabric: ca20m²

Weight	380 g/m ² — 11.2 oz/sqyd	
Thickness	0.45 mm — 450 microns	
Width	177 cm - 267 cm — 69.7 in 105.1 in.	

Superior elongation and tear resistance
No deformation during processing and use
Superior aesthetic and mechanical durability
Smooth finish easy to clean, space saving, easy rolling

MOTORIZATION & AUTOMATION

Sunair is proud to offer the full line of Somfy motors and controls for our awnings and screens program SOMFY RTS features motors with an integrated radio receiver that allows you to operate the awning by remote control with a wall mounted or hand held remote or by smart phone device. With a simple click of a button on your remote, the awning or shade will extend or retract automatically. The Altus motors is ideal for the Solharo system.

AVAILABLE BATTERY OPERATED REMOTES

Telis 16 RTS Hand-held Remote

One (1) through (16) channel hand held or wall mounted remotes are available. Remotes are available in different colors to suit your style, please inquire.

Telis hand-held remotes offer convenient and simple operation of every type of motorized application. Channels help organize the motorized products that are operated. Single channel remotes can operate one individual product or one group of motorized products. Multiple channel remotes can handle groups of motorized products.

Telis 1 Chronis RTS Timer

DecoFlex WireFree™ RTS Wall Switches

Telis 1 Patio for exterior use

Smoove® 1 RTS Surfact Mount Wall Switch

AVAILABLE SENSORS & CONTROLS

EOLIS 3D WIREFREE™ RTS

Wind sensor for lateral

Arm Awnings only

The Eolis 3D WireFree™ RTS Wind Sensor is a wireless, battery powered wind sensor that will automatically retract an awning based on wind generated movements.

SOLIRIS RTS 24V KIT
Sun & Wind Sensor

The Soliris RTS Sun and Wind Sensor automatically controls your RTS motorized products based on current weather conditions.

ONDEIS® WIREFREE Sun & Rain Sensor

The Rain Sensor is a solar-powered combined rain and sun sensor compatible with Radio Technology Somfy® motorized exterior products, including awnings and screens.

The Somfy myLink™ is a simple device that turns your smartphone or tablet into a sophisticated remote control for motorized products featuring Radio Technology Somfy®, allowing you to operate them whether you're home or not. Combine all the benefits of Somfy's RTS hand-held remotes and timers in a convenient app.

Sunis & ThermoSunis Indoor WireFree™ RTS Sensors

SOMFY MOTOR WIRING

Radio Technology Somfy

Radio Technology Somfy® (RTS) allows wireless radio control of motorized applications via the RTS family of controls.

The three (3) wire cords can be wired in parallel . If a hard-wire motor is ordered, the standard four (4) wire cords must be wired with a traditional toggle wall switch. Solharo can not be ordered with molded plugs on the end.

All Somfy Motors are UL and CSA Recognized

 All SOMFY motors are UL Recognized and can be found under the following file numbers:

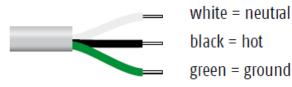

E60495, E60888, E63714

Type of power cable
