

## SC4500 MASTERSHADE®

## **Exterior Rolling Zipper Screen / Large Cassette**

The SC4500 is an exterior rolling zipper shade which can be used for sun and insect control or used with clear vinyl windows for light weather protection. The fabric runs inside vertical zippered guide tracks by means of gravity. A specially designed horizontal weighted hem bar keeps the fabric taut. The The SC4500 box is 53/16" deep, and  $5\frac{1}{4}$ " high. The SC4500 shades are also ideal for use in conjunction with some Pergola® model awning systems as side screens to create an enclosure.

- Larger standard box screen.
- Zipper retention system for fabric.
- Ideal with mesh fabric or vinyl fabric and windows.
- Optional "U" channels available for easy installation on uneven walls and columns.
- Gear or Motorized operation.
- Cassette bolts to ceiling or wall without brackets.

Revised 02/06/2019

## **BENEFITS OF ZIPPER SCREENS WITH MESH**

- Creates an instant screened in porch with the ability to revert to a full open porch when desired.
- Zipper fabric retention will keep pesky bugs at bay when using a closed mesh fabric.
- Reduces patio temperatures and keeps your space cooler.
- Cuts down on solar glare while retaining your view depending on mesh fabric type and openness factor.
- Cuts down on interior fading of floors, carpets and furniture.

## **BENEFITS OF ZIPPER SCREENS WITH WINDOWS**

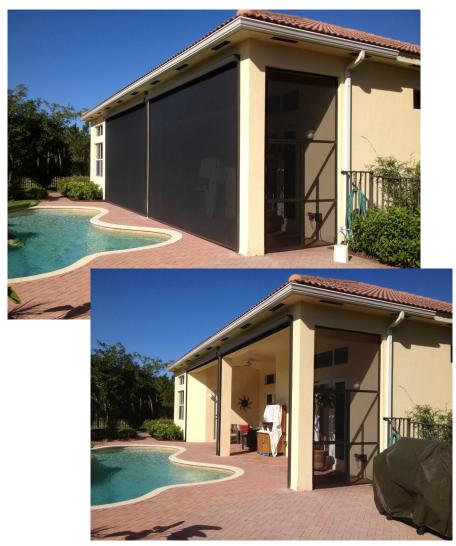

- Great for residential and commercial spaces like restaurants.
- Creates an instant enclosed space by lowering the shades.
- Keeps moderate weather at bay by keeping rain and moderate winds from reaching the space.
- Adding heaters will heat the space and make it usable during cooler months.

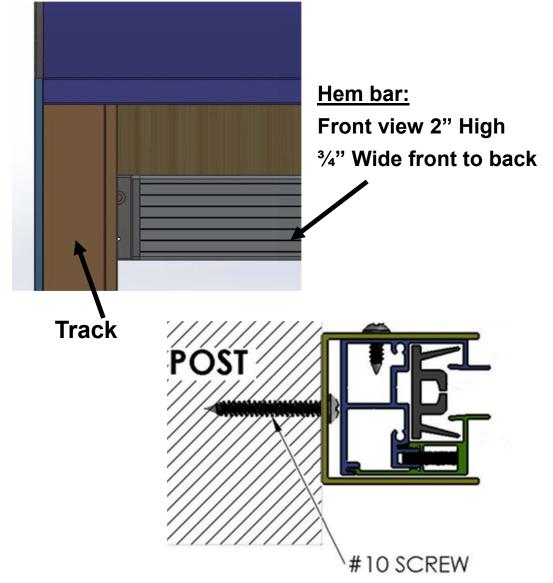

## **SC4500 Mastershade® Installations**

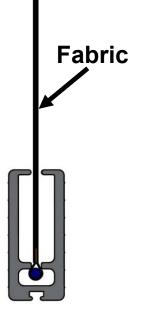

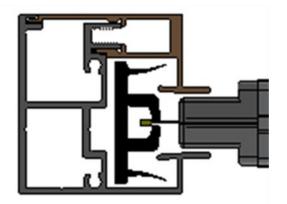

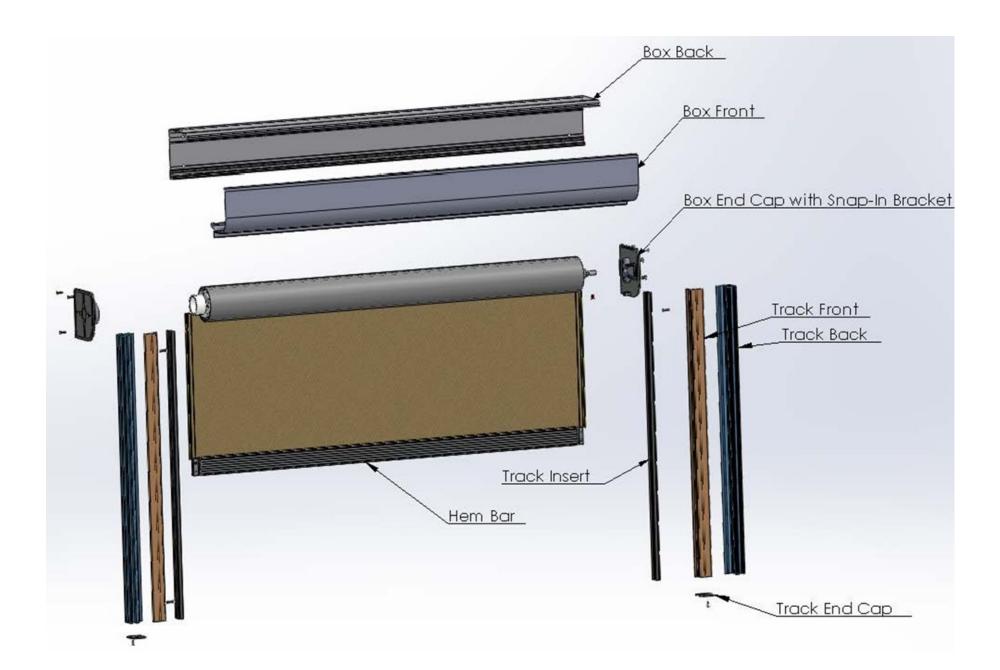

Track with optional "U" channel can be added if mounting between columns. The U channel is typically only used if either top opening or bottom opening between columns is more than the other.

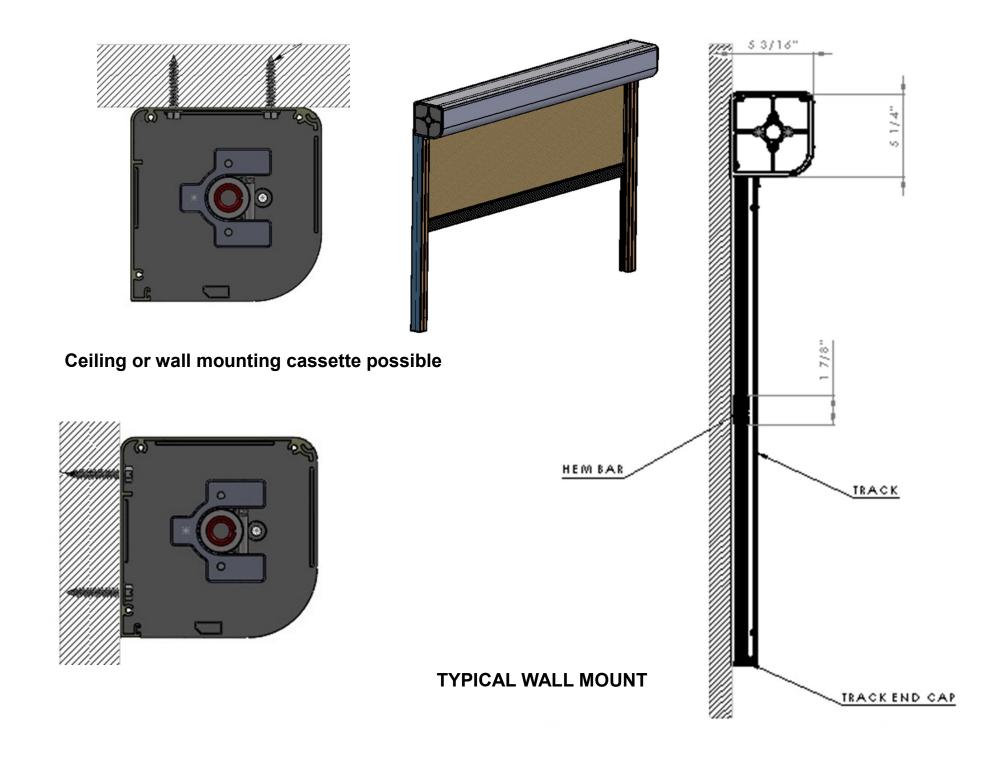

Hem bar: Side view

Standard track with zipper and track assembly.

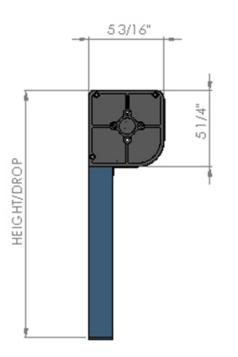

## **SC4500 SCREEN WITH ZIPPER**

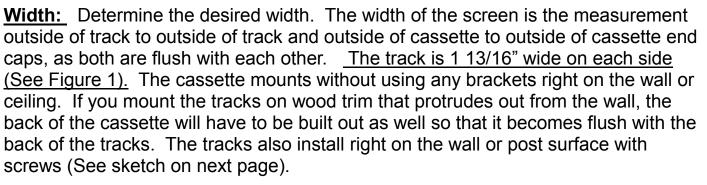

#### SC4500 FEATURES:

#### **SUNAIR BENEFIT**

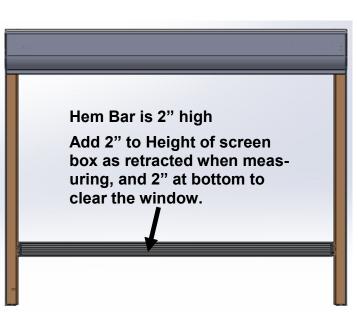

| Easy to install and remove roller tube        | <b>B</b> | The SC4500 uses our heavy<br>duty SC3569M metal idler<br>bracket with a removable<br>bushing.   | The metal idler bracket makes it easy to<br>remove the roller tube and fabric<br>assembly for ease of installation of the<br>cassette. It is designed to withstand the<br>torque of larger heavy shades. |
|---|----------|---|--|
| Install cassette<br>without brackets          |          | The SC4500 cassette installs<br>right onto the <u>wall</u> or directly<br>onto <u>ceiling</u> using smaller<br>screws without the need for<br>brackets. | Eliminating brackets makes for faster installation and a cleaner look.   |
| Internal PVC zipper<br>insert with winglets   |          | The SC4500 "Zipper" insert<br>PVC has soft "winglets" on<br>each side of the zipper<br>channel.   | Vinyl winglets on the insert PVC<br>provide tension while offering flexibility<br>to expand and contract for the fabric as<br>the temperature changes.   |
| Easily installation of track to wall or side  |          | The SC4500 track is easily<br>attached to the back wall or<br>side wall using small screws<br>rather than track brackets<br>(Back wall shown).          | Eliminating track brackets makes for a faster installation and a cleaner look.   |
| U channel for<br>un-even wall<br>installation | POST     | The "U" channel can be added to the standard track.   | This "U" channel makes it easier to<br>install the tracks between uneven<br>columns or inserting into columns for<br>new construction.   |

#### **MEASURING SC4500:**

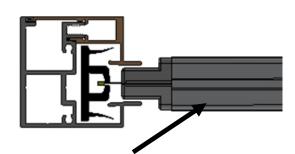

<u>CEILING MOUNTING BETWEEN PILLARS:</u> If mounting under a patio or ceiling mounting the height is not adjustable and height is total height of opening. If mounting between pillars use the narrowest dimension and deduct 1/8" to ¼". If there is a very little difference on the width from top to bottom, you may be able to choose the narrowest and install the tracks right to the column and caulk. If distance is bigger, you should add U channels. <u>If ordering the "U" Channels Sunair, will reduce the width of the fabric and hem bar by ¾" to allow for the installation of the U channels with about 3/8" play on each side (see drawing next page). Sunair will not reduce the width of the cassette, only the width of fabric, zipper tracks, and hem bar.</u>

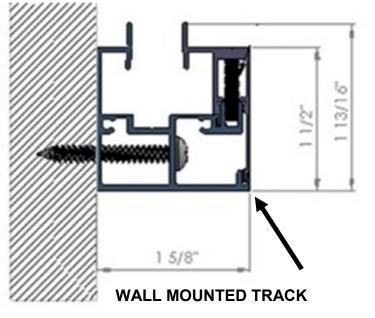

<u>WALL SURFACE MOUNTING</u>: If mounting in front of a window opening, add at least 4" to the width of the opening or glass area to fit the screen. If surface mounting determine the height of the opening or window.

#### HEIGHT:

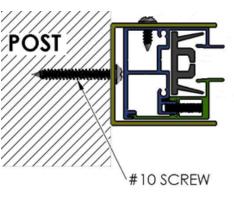

The fabric or screen mesh should cover the height of the window. The height of the screen includes the cassette height. To calculate the height of the shade if surface mounting to front wall consider adding the height of the cassette (5 1/4") plus 4" (2" at top and 2" at bottom) to the total height of opening to be covered (see sketches on left). This way, the hem bar is not seen while shade is retracted or extended. Also watch out for casement windows that will interfere with the hem bar when the shade is retracted (In such a case, mount the top of the cassette 7  $\frac{1}{2}$ " - 8" above the opening window edge). In addition, add 2" at the bottom, so the lowered hem bar goes past the glass edge for a total of about 10 " to the height.

Hem bar: Top view <sup>3</sup>/<sub>4</sub> " wide front to back

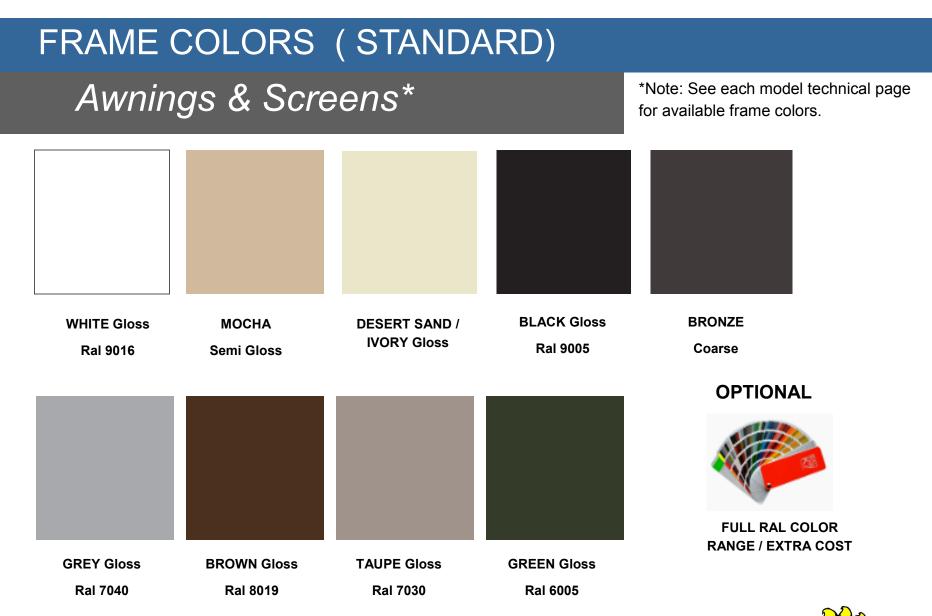

SIDE MOUNTED TRACK WITH U CHANNEL

SIDE MOUNTED TRACK

If using the "U" Channels, Sunair will reduce the width of the fabric and hem bar (Not cassette) to allow for the installation of the U channels between pillars with about 3/4" – 1" (Allowing for 3/8" to 1/2" play on each side). This takes into consideration the screw and wall thickness of the actual U channel so screen can be installed. Unless deductions were made in production, U channels cannot be added later.

## **Exterior Screen Fabric** TEXTILE NONO<sup>™</sup>9 BRAND FABRIC 5 % Open Screen Mesh ShadowTexture Granite **Expresso** Texture White Stone Texture Tobacco Charcoal Flat Black Bone

TEXTILENE<sup>®</sup> nano<sup>™</sup> 95 is a durable, yet lightweight synthetic fabric. It is lighter and finer with the same technical qualities as the original TEXTILENE<sup>®</sup>. TEXTILENE<sup>®</sup> nano<sup>™</sup>95 is excellent for exterior use and can reduce energy costs while blocking up to 95% of the sun's harmful rays.

## **502 PROOF SOLTIS / OPAQUE SATINE FINISH COLORS**

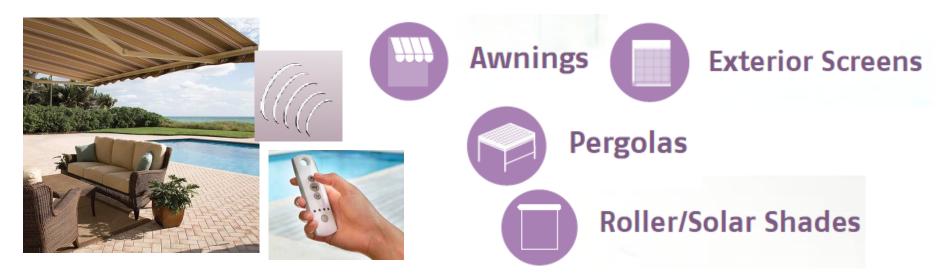

The Precontraint 502 fabric from Ferrari also offers excellent dimensional stability with minimal stretching and exceptional dirt resistance thanks to a PVDF topcoat on both sides. The fabric is therefore perfect for use on retractable zipper screens with window film. The fabric is 16.8 oz / sq. yd. with a satin finish. Fabrics are fire retardant / certificate is available upon request.

satin finish

## **MOTORIZATION & AUTOMATION**

Sunair is proud to offer the full line of Somfy motors and controls for our screen program. SOMFY RTS features motors with an integrated radio receiver that allows you to operate the awning by remote control with a wall mounted or hand held remote or by smart phone device. With a simple click of a button on your remote, the shade will extend or retract automatically.

## AVAILABLE BATTERY OPERATED REMOTES

One (1) through (16) channel hand held or wall mounted remotes are available. <u>Remotes are available in</u> <u>different colors to suit your style,</u> <u>please inquire.</u>

Telis hand-held remotes offer convenient and simple operation of every type of motorized application. Channels help organize the motorized products that are operated. Single channel remotes can operate one individual product or one group of motorized products. Multiple channel remotes can handle groups of motorized products.

Telis 1 Chronis RTS Timer

DecoFlex WireFree™ RTS Wall Switches

Smoove® 1 RTS Surfact Mount Wall Switch

## **AVAILABLE SENSORS & CONTROLS**

#### SOLIRIS RTS 24V KIT

Sun & Wind Sensor

#### **ONDEIS® WIREFREE**

Sun & Rain Sensor

The Soliris RTS Sun and Wind Sensor automatically controls your RTS motorized products based on current weather conditions.

The Rain Sensor is a solar-powered combined rain and sun sensor compatible with Radio Technology Somfy<sup>®</sup> motorized exterior products, including awnings and screens.

The Somfy myLink<sup>™</sup> is a simple device that turns your smartphone or tablet into a sophisticated remote control for motorized products featuring Radio Technology Somfy<sup>®</sup>, allowing you to operate them whether you're home or not. Combine all the benefits of Somfy's RTS hand-held remotes and timers in a convenient app.

#### Sunis & ThermoSunis Indoor WireFree™ RTS Sensors

## SOMFY MOTOR WIRING

Radio Technology Somfy Radio Technology Somfy® (RTS) allows wireless radio control of motorized applications via the RTS family of controls.

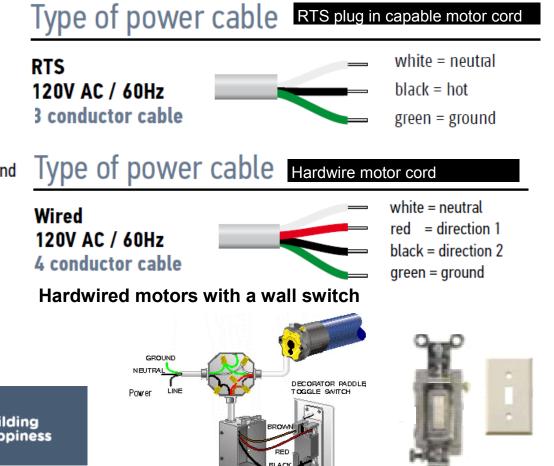

#### All Somfy Motors are UL and CSA Recognized

 All SOMFY motors are UL Recognized and can be found under the following file numbers:

E60495, E60888, E63714

The three (3) wire cords can be wired in parallel and can be ordered with a molded plug to simply plug into an exterior UL approved GFI outlet. The standard four (4) wire cords must be wired with a traditional toggle wall switch. <u>Screens</u> can not be ordered with molded plugs on the end.

# MAESTRIA OSTACLE DETECTION EXTERIOR SCREEN MOTOR

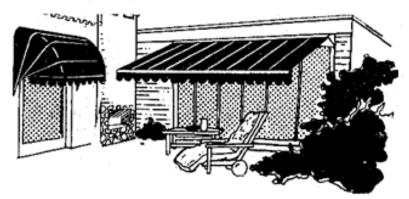

The SOMFY <u>Maestria obstacle detection motor</u> is the recommended motor to be used for all zipper screens. These motors accurately detects obstacles, stopping after meeting an object traveling up or down. Protects carrier products and prevents fabric damage resulting from screen bunching and slipping from the guides. The motor senses and distinguishes between an actual obstacle and wind, even wind gusts, so it doesn't stop unnecessarily, resulting in fewer service calls and end user peace of mind.
