

Our Louvered Pergolas are custom made to fit your space and can be mounted to most walls, decks and patios or constructed as a free standing system. Our louvered systems are covered by six patents, including water management within the internal structure and downspouts hidden within the posts. For greater protection, the OPERA and BRERA models can be configured with retractable motorized roll down RASO screens. All models are available with optional RGB multi colored or white LED lighting, fans, and heaters. Maximum size for a single bay is 18' wide x 22'11" projection. Couple multiple bays together with shared post to cover for even larger spaces.

Since 1880 Sunair® has been protecting you from the sun and rain.

Now, we offer you the opportunity and the satisfaction of creating something unique.

A reflection of your personal style.

LOUVERED ADJUSTABLE MOTORIZED PERGOLA® STRUCTURES

For Your Home or Business

www.sunairawnings.com

Our motorized Louvered Pergolas are perfect for small to larger spaces, including restaurant cafés, hotels, and residential backyard patio spaces. Louvered Pergolas are available in three models to best fit your needs. They provide you with protection from sun, rain and cooler weather with a unique level of control over nature. They combine style and function to create and enhance your outdoor living space.

OPERA & VISION models have adjustable louvered roofs with a touch of the remote, louvers can be positioned anywhere within their 140-degree range of motion for the exact amount of sun protection or ventilation desired. For rain protection close the louvers and the rain will be diverted through the integrated gutter system. Once the rain ends, the louvers move at your complete command to allow for more shade or sunshine. Our BRERA model also allows the louvers to adjust to the sun angle but are also fully retractable for an alfresco dining experience.
